

Nordic Facility Services AB

Kungsgatan 12, 111 43 Stockholm, Sweden

Hello,

We are refurbishing the lighting and small power in our Belgrade office and would like a price for roughly the following. We will need around two hundred meters of NYM 3x2.5 cable and about thirty B16 single pole breakers. For the ceiling we plan eighteen 600 by 600 LED panels, 40 watt, neutral white 4000K. Please add four 4-pole residual current devices, 40 amp, 30mA, and six surface IP44 sockets for the storage room.

If you have an alternative for the panels with better efficiency, feel free to suggest it.

Best regards,

Anna Lindqvist

Facility Manager
